INTEGRATOR ENCLOSURE

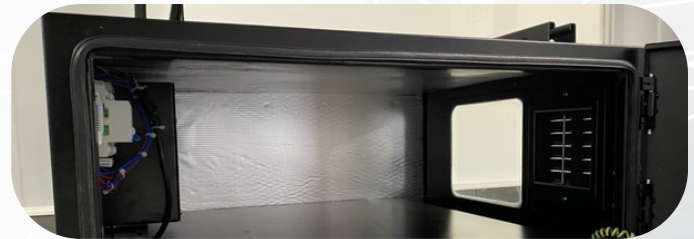

Size - XS

Protection For Your Projector - XS Integrator Projector Enclosure

Our fan-cooled Integrator Series Projector Enclosures go above and beyond to keep your projector performing at its best.

Built for professional integrators and AV specialists, the Extra Small Integrator Enclosure is designed for compact projectors while maintaining the same industrial strength and protection found across the full Integrator lineup.

With a rugged exterior, active cooling system, and precision-engineered structure, this enclosure ensures your projector remains cool, secure, and operational in a wide range of environments—from controlled indoor spaces to outdoor installations.

Key Features:

WEATHERPROOF DESIGN

With a waterproof exterior and sealed doorway, this enclosure offers reliable protection against elements.

FULLY GROUNDED ELECTRICAL SYSTEM

Equipped with complete grounding to ensure electrical safety and protect sensitive equipment.

TOP & BOTTOM MOUNTING OPTIONS

Flexible installation options allow mounting from the ceiling or base for secure and easy setup.

SAFE & SECURE, VANDAL-RESISTANT LOCKING

Designed with tamper-resistant hardware to keep your projector safe from theft and unauthorized access.
